

*Your Total Safety Management Solution*

for

**ISO 45001**

**Consulting & Certification Assistance**

**Pat Patterson, CSP – President – 35 Years' Experience**

**28 Years of Dedicated Comprehensive Service to Clients**

**An ISO 45001 Occupational Health & Safety (OH&S) Management System will enable your organization to improve its OH&S performance by:**

- developing and implementing an OH&S policy and OH&S objectives
- establishing systematic processes which consider its “context” and which take into account its risks and opportunities, and its legal and other requirements
- determining the hazards and OH&S risks associated with its activities; seeking to eliminate them, or putting in controls to minimize their potential effects
- establishing operational controls to manage its OH&S risks and its legal and other requirements
- increasing awareness of its OH&S risks
- evaluating its OH&S performance and seeking to improve it, through taking appropriate actions
- ensuring workers take an active role in OH&S matters

**In combination these measures will ensure that an organization’s reputation as a safe place to work will be promoted, and can have more direct benefits, such as:**

- improving its ability to respond to regulatory compliance issues
- reducing the overall costs of incidents
- reducing downtime and the costs of disruption to operations
- reducing the cost of insurance premiums
- reducing absenteeism and employee turnover rates
- recognition for having achieved an international benchmark (which may in turn influence customers who are concerned about their social responsibilities)

---

***LAAP CAN HELP!!!***

LAAP is an innovative health and safety management and consulting firm providing comprehensive services to a variety of clients nationwide and abroad. Our ISO 45001 Consulting & Certification Assistance program begins with a review of your entire OH&S Management System, or assists in the development of one, performing a gap analysis in comparison to the ISO 45001 standard, and provides you with a comprehensive report of our findings.

Our ISO services consists of:

**Phase I – Gap Analysis**

Perform a Gap Analysis of your current OH&S Management System to determine any shortcomings and corrective actions that may be needed prior to contacting a registrar for ISO certification. This analysis will include review of your internal policies, procedures, and documentation as they pertain to the ISO 45001 Management System Guidelines.

**Phase II – Filling the Gaps**

Filling the gaps and implementation of Clients’ OHS Management System - This will include assisting the Client representative in development of processes required by ISO 45001 (filling the gaps) and visiting Client facilities that will be under the Corporate certification umbrella.

**Phase III – Internal Auditing**

Internal Auditing Service – LAAP will serve as Client’s Internal Auditor, as required by ISO 45001 Clause 9.2, performing the required internal audit at intervals specified by the client in their OHS Management System.

NOTE: Client may contract for either Phase, or all three Phases, depending on their immediate needs.
